Skills

Frontend

- HTML
- CSS
- Bootstrap
- JavaScript
- React.js

Backend

- Python
- Express
- Node.js

Data base

- SQLite

Other Skills

- C++
- Data Structures & Algorithms
- Flexbox
- MongoDB

Education

Nxtwave Disruptive Technologies

Oct 2023 - Ongoing

Industry Ready Certification in Full-stack Development

IIIT Raichur, Raichur, Karnataka

2023 - 2027

B Tech (Bachelor of Technology)_Computer Science Engineering (CSE) (6.0 CGPA)

Sri Chaitanya junior college, Hyderabad

2021 - 2023

Intermediate_MPC (98.6%)

M.V. Raman High School, CBSE, Wanaparthy

2020 - 2021

Secondary School Of Certificate (92.0%)

Project

Wikipedia Search Application

[project1_link](#)

Technologies used : HTML, CSS, JS, REST API Calls, Bootstrap

Developed custom wikipedia search application where user can search and view curated results and can see detailed explanation in wikipedia by clicking on the specific result

- Displayed list of search results with HTML list elements with hyperlink as url, styled list using CSS, Bootstrap and implemented responsiveness using Flex properties and CSS Box model.
- Fetched search results from server asynchronously using fetch GET HTTP API call. When a user clicks on a particular result, opens the website in a new tab by using the target attribute of the anchor tag in HTML.

Movies App (Netflix/Amazon Prime Clone)

[project2_link](#)

Technologies used : HTML, CSS, JavaScript, React JS, Bootstrap, React Slick, Figma, client storage.

Created a comprehensive OTT platform for movie lovers, mimicking the functionality of Netflix and Amazon Prime.

- Implemented user-friendly navigation with React Router, dynamic scrolling with React Slick, and visually appealing UI with Figma.
- Accessible movie database and authentication through TMDb APIs, and secure user login with client storage.

Emoji Game

[project3_link](#)

Technologies used : React JS, CSS

Designed a fun, challenging memory game with randomized emoji clicks.

- Utilized React components, props, conditional rendering, and state updates to create dynamic gameplay.
- Enhanced with CSS for a visually appealing design.

Apna Video Call

[project4_link](#)

Technologies used : CSS, JavaScript, React.js, Node.js, WebRTC

Built a full-stack real-time video calling web application that allows users to join virtual rooms, interact via live video streams, and manage session-based communication. The application uses a React frontend for a responsive user interface and a Node.js backend to handle authentication, routing, and real-time signaling. Integrated WebRTC for peer-to-peer video communication and implemented REST APIs for user management. The project is deployed using modern cloud platforms, ensuring accessibility and scalability.
